3.Now you can find this window. Enter all data which we are provide you. And make sure your settings are like this:

• • • • • • • • • • • • • • • • • • •	Site Name
	president
	Host / IP / URL WwwAdvanced
	Username
	Anonymous
	Password
	Port Timeout Retries 21 5 99 ⊽ Retry On
	PASV 🗖 Use Proxy
	Connection
	FTP
- Comments	- SSL Options SSL Listings  SSL Transfer  Clear (CCC)
	OpenSSL     Windows SSL

Port, connection, must like this. Otherwise you get errors. After all done, click on "Connect".

## 4. You can find this window:

Ready 1 Rev 10

In left pan, this is your local folder. Here you have to find your local root or website folder.

Now you have to double click on "httpdocs" in right pan.

5.Now you can find this window. In left pan you have to give your local root path where you saved the site. Select what you have to upload and click on "**Upload**"

Now you have to wait for some time which is depending on your data size. After this don't forget to "disconnect" and "exit"
